

Dear Parent/Guardian:

We are excited to announce a new feature on our school meals website to support the health and wellness goals of our students. Visitors to the website now have the ability to view nutrition information for all of the foods we offer to students at breakfast and lunch.

Just click on “Nutrition Information” under the Menu drop-down at the top of the screen. Through our interactive site, users can mouse-over menu items to view a quick nutrition snapshot, or select multiple menu items to obtain a customized nutrition report. We hope you find this new feature useful and we welcome your feedback or comments.

Try it out!
